

Magento Extension – Product PDF

User Manual

Version 1.0

1. Overview	1
2. Integration	1
3. Settings	1
4. Template integration	2

1. Overview

Product PDF is a Magento extension designed to allow customer to to print Product Sheet in PDF format.

2. Integration

To integrate extension, perform this steps :

1. Copy directory app/code/local/MDN to app/code/local
2. Copy file app/locale/fr_FR/MDN_ProductPDF.csv to app/locale/fr_FR/
3. Copy file app/etc/modules/MDN_ProductPDF.xml to app/etc/modules/
4. Then, refresh cache from magento admin, menu System > cache management

3. Settings

To configure ProductPDF :

1. Log in on Magento Admin
2. Go in Menu System > Configuration > Catalog > Product PDF

Note: if “access denied” error is raised, you have to log out and log in on magento back office

You can define this parameters:

- PDF Logo: select picture displayed at the top left corner
- Company name
- Store Address
- Store contacts (email, phone, fax)
- PDF Footer: information displayed at the bottom of the page

- Display associated products : if selected, related products are displayed at the bottom of the PDF
- Product description : select if you wish to display “Short description” or “description”

4. Template integration

To allow you customer to print Product Pdf sheet from product view, edit file `app/design/frontend/default/your_theme/template/catalog/product/view.phtml` and add the following code (for example line #60, after `getReviewSummary()` function)

```
<a href="<?php echo $this->getUrl('ProductPDF/Product/Print',  
array('product_id' => $_product->getId())); ?>"><?php echo $this->__('Print  
product !') ?></a>
```
